Host: Burr Sutter, Sr. Product Manager, Developer Experience/Tools Burr Sutter is a current Sun Java Champion, former president of the Atlanta Java Users Group and founder of the Atlanta Chapter of the International Association of Software Architects. He has over 20 years of software design and development experience along with numerous published articles, book chapters, and developer conference speaking engagements.

Upcoming webinars

Drooling for Drools - Its Proctor Time
Date: October 6, 2010  Time: 16:00 UTC, 12:00 Noon Boston, 9:00 San Francisco, 12:00 Midnight Singapore
Description: Drools 5.0 introduced the Business Logic integration Platform which provides a unified and integrated core for Rules, Workflow and Event Processing.
Presenter: Mark Proctor received his B.S. Eng. in Engineer Science and Technology and then his M.S. in Business and Information Systems; both from Brunel University, West London. His M.S. thesis was in the field of Genetic Algorithms; which is where he first got his interest for anything AI related.

Seam in the Clouds
Date: October 20, 2010  Time: 16:00 UTC, 12:00 Noon Boston, 9:00 San Francisco, 12:00 Midnight Singapore
Description: In this session, we will dive deep into how to build cloud agnostic applications. Seam, based on standardized contextual dependency injection (JSR-299: Contexts and Dependency Injection) allows you to port your code and skillset into the cloud.
Presenter: Pete Muir is the project lead for Seam and Weld (the reference implementation of JSR-299: Contexts and Dependency Injection for Java EE), and is the co-founder of Arquillian, a test harness for Java application servers. Pete represented JBoss on the JSF 2.0 Expert Group.

Cloudy with a chance of BMWs
Date: November 3rd, 2010  Time: 16:00 UTC, 12:00 Noon Boston, 9:00 San Francisco, 12:00 Midnight Singapore
Description: Are you interested in all things JBoss+Cloud, then this is your opportunity to ask. Bob McWhirter (BMW) is lead JBoss Cloud Architect and will cover projects like BoxGrinder, Cooling Tower and CirrAS.
Presenter: Chief architect for middleware cloud computing at Red Hat, Bob McWhirter leads a team of engineers that is paving the way for the enterprise cloud computing paradigm shift. Named a Red Hat Fellow in 2009, McWhirter joined Red Hat in 2007 and also leads the TorqueBox project, creating a Ruby application server on top of the core JBoss Application Server.
